

County	Does your court currently have a judge viewer (or similar type system/application) in place?
Alachua	We use our in-house ICMS project as the judge viewer. Our plan is to expand it to meet the TIMS CAPS requirements, and improve performance for bench users.
Baker	We use our in-house ICMS project as the judge viewer. Our plan is to expand it to meet the TIMS CAPS requirements, and improve performance for bench users.
Bay	Benchmark has a notes feature that the judges can use.
Bradford	We use our in-house ICMS project as the judge viewer. Our plan is to expand it to meet the TIMS CAPS requirements, and improve performance for bench users.
Brevard	No judge viewer in place.
Broward	We do not have efficient systems for judges to view electronic court documents, other than Odyssey events, which at times can be tedious. We have submitted a budget request to Broward County and are waiting for a response. We are looking at purchasing a vendor solution or creating the custom system in house/outsource.
Calhoun	No judge viewer in place.
Charlotte	Currently have Pioneer. The clerk is working with the vendor to create a judge viewer, with the clerk writing a lot of the interface.
Citrus	Judge viewer in place in all five counties. Rely on the clerks' system for viewing document images. Intend to deploy a circuit-wide ICMS installation for consistent application interface. Implementation schedule not set.
Clay	No Response
Collier	Set to start a form of in court processing on July 1, 2012. The system being used is Aptitude Solutions, and the court has provided a list of requirements. Expect an estimate as to how much this will cost.
Columbia	No judge viewer in place.

County	Does your court currently have a judge viewer (or similar type system/application) in place?
Miami Dade	The 11th circuit has a judge viewer, e-Viewer, that was developed in-house, and is currently being used by judges in the Family and DV divisions to quickly view electronic images in court.
DeSoto	Converted to Clericus in June 2012. Discussion about using aiSmartBench in the future.
Dixie	No judge viewer in place.
Duval	Clerk of Court created a program called CORE that allows the judges access to CMS data and court calendar creation for civil cases.
Escambia	No judicial viewer and currently no plans to implement one.
Flagler	No judge viewer application in place. Currently evaluating available products on the market, but have not made a final decision. There are still plenty of questions to be answered in the process, with the decision of who pays for and maintains the system looming as a very big one.
Franklin	No judge viewer in place. The only system that is available for judges to view electronic case files is CCIS.
Gadsden	No judge viewer in place. The only system that is available for judges to view electronic case files is CCIS.
Gilchrist	We use our in-house ICMS project as the judge viewer. Our plan is to expand it to meet the TIMS CAPS requirements, and improve performance for bench users.
Glades	Use FACC system; have not been notified when Clericus will be implemented.
Gulf	No judge viewer in place.
Hamilton	No judge viewer in place.
Hardee	The judge may view only with whatever Clericus has to offer as that is what these counties are using and there is an imaging portion of the application.
Hendry	Use FACC system; have not been notified when Clericus will be implemented.
Hernando	Judge viewer in place in all five counties. Rely on the clerks' system for viewing document images. Intend to deploy a circuit-wide ICMS installation for consistent application interface. Implementation schedule not set.

County	Does your court currently have a judge viewer (or similar type system/application) in place?
Highlands	The judge may view only with whatever Clericus has to offer as that is what these counties are using and there is an imaging portion of the application.
Hillsborough	Evaluating the judge view applications that are on the market, as well as, looking into what the cost, resources and time would be to expand our Judicial Automated Workflow System (JAWS) that we developed in house, to include a judge viewer. We have not made a final decision nor do we have a timeframe for implementation set.
Holmes	No judge viewer in place.
Indian River	The addition of very limited stored case notes by the judge is possible, but there is no tiered level of this function. The notes are available to all, so it's not very useful at this time. Additional functionality has been requested and may be possible with future software versions, where a judge can specify who has the right to see his notes - such as the judge only, JA, case managers, other court employees, or any combination of the above.
Jackson	No judge viewer in place.
Jefferson	No judge viewer in place. The only system that is available for judges to view electronic case files is CCIS.
Lafayette	No judge viewer in place.
Lake	Judge viewer in place in all five counties. Rely on the clerks' system for viewing document images. Intend to deploy a circuit-wide ICMS installation for consistent application interface. Implementation schedule not set.
Lee	In a pilot with Tyler for SessionWorks; 6 judges have received software and equipment. Have provided a list of requirements to Tyler for next release.
Leon	Judges have access to civil case files using the clerk's in-house system; however it's really only usable in chambers. There is nothing for criminal cases except JIS, and we use an in-house viewer system for 1st appearance.

County	Does your court currently have a judge viewer (or similar type system/application) in place?
Levy	We use our in-house ICMS project as the judge viewer. Our plan is to expand it to meet the TIMS CAPS requirements, and improve performance for bench users.
Liberty	No judge viewer in place. The only system that is available for judges to view electronic case files is CCIS.
Madison	No judge viewer in place.
Manatee	Running aiSmartBench with Courtview as the CMS. Scheduled to convert to Clericus in September 2012.
Marion	Judge viewer in place in all five counties. Rely on the clerks' system for viewing document images. Intend to deploy a circuit-wide ICMS installation for consistent application interface. Implementation schedule not set.
Martin	No ability for judges to add and save notes at this time. A read-only viewer is provided for both applications using IE. We have no judge viewer that has functionality equivalent to a few applications that have been designed and purchased by other circuits.
Monroe	No judge viewer system. The judge has read only access to the clerk's CMS.
Nassau	No Response
Okaloosa	No judicial viewer and currently no plans to implement one.
Okeechobee	No ability for judges to add and save notes at this time. A read-only viewer is provided for both applications using IE. We have no judge viewer that has functionality equivalent to a few applications that have been designed and purchased by other circuits.
Orange	No Response
Osceola	No Response
Palm Beach	Judges use 15th circuit's version of ICMS to the exclusion of any other product (in many cases) including the Clerk's systems, Showcase and Banner, and are extremely satisfied.
Pasco	Hope to use Session Works in the install of Clericus. The civil "go live" date for Clericus is March 2013.

County	Does your court currently have a judge viewer (or similar type system/application) in place?
Pinellas	Currently installing, configuring and testing Tyler's Odyssey. Working with Tyler to set up a pilot to test their SessionWorks product. "go live" date for county civil is September 17, 2012.
Polk	The judge may view electronic (scanned) documents from an application on the PC in the courtroom and in chambers. Some files may start being received naitvely in electronic form as e-filing gets underway. Polk uses New Visions applications.
Putnam	No judge viewer application in place. Currently evaluating available products on the market, but have not made a final decision. There are still plenty of questions to be answered in the process, with the decision of who pays for and maintains the system looming as a very big one.
St. Johns	No judge viewer application in place. Currently evaluating available products on the market, but have not made a final decision. There are still plenty of questions to be answered in the process, with the decision of who pays for and maintains the system looming as a very big one.
St. Lucie	The addition of very limited stored case notes by the judge is possible, but there is no tiered level of this function. The notes are available to all, so it's not very useful at this time. Additional functionality has been requested and may be possible with future software versions, where a judge can specify who has the right to see his notes - such as the judge only, JA, case managers, other court employees, or any combination of the above.
Santa Rosa	Implemented SmartBench for all judges. Transitioning to paperless in civil and criminal. Paper is being provided upon request.
Sarasota	In the process of implementing Pioneer's Benchmark CMS. Benchmark is said to have a judicial viewer, but the court has not seen the final product yet and no "go live" date has been provided.
Seminole	No judge viewer in place.

County	Does your court currently have a judge viewer (or similar type system/application) in place?
Sumter	Judge viewer in place in all five counties. Rely on the clerks' system for viewing document images. Intend to deploy a circuit-wide ICMS installation for consistent application interface. Implementation schedule not set.
Suwannee	No judge viewer in place.
Taylor	No judge viewer in place.
Union	We use our in-house ICMS project as the judge viewer. Our plan is to expand it to meet the TIMS CAPS requirements, and improve performance for bench users.
Volusia	No judge viewer application in place. Currently evaluating available products on the market, but have not made a final decision. There are still plenty of questions to be answered in the process, with the decision of who pays for and maintains the system looming as a very big one.
Wakulla	No judge viewer in place. The only system that is available for judges to view electronic case files is CCIS.
Walton	No judicial viewer and currently no plans to implement one.
Washington	No judge viewer in place.

ICMS: Integrated Case Management System

TIMS: Trial Court Integrated Case Management Solution

CAPS: Court Application Processing System

CCIS: Comprehensive Case Information System
